College of Education and Human Ecology

What are some of the reasons why Arnulfo's audit went smoothly?

- We helped with the data security plan
- We configured the computer to meet requirements
- We signed off as the data security officer
- He didn't try and do this on his own

What are the roles of EHE OIT and local IT groups?

- Every College is different. However, every college is responsible for reducing information risk.

- We are here to help.
  - Data security plans
  - Implement new solutions
  - We can help get you in touch with other resources
  - System Security Officer
  - The earlier you get us involved the better

What are we doing in EHE OIT?

- Implementing Data Loss Prevention Software

- Moving our backups to Wright State University

- Moving towards name.# login for EHE computers

- Partnering with the EHE Research Methodology Center (RMC) to purchase / build resources to help researchers

Some general guidelines

- Reach out, we are here to help
- No personal devices for research data
- Take the IDP training in carmen / buckeyelearn
- Use the reference guides provided by enterprise security
- "Free" services should be a trigger to talk with your IT groups. Most consumer tools, Google Docs, Dropbox, iCloud, Evernote… etc. have not been reviewed for security and cannot be used for regulated / restricted data storage
- Every University is different

What do I really need to know?

Office of Information Technology (OIT)

614-247-8324

servicedesk@ehe.osu.edu

9:00AM – 4:00PM Walk-in hours RA016
